# Cause of peer pressure in engines

Engines should be about getting more, not settling for less. Volkswagen's revolutionary TSI engine that's BS6 Compliant strikes a fine balance between both, power and efficiency. It dominates with 110 PS and 175 Nm torque. You'd think all this power would guzzle a lot of fuel, but you'd be wrong. It gets you through more kilometres with lesser emissions.

Complementing this breakthrough internal framework is the superior build quality of Volkswagen. Trust us, it won't cost you the Earth.
